

Alesta[®]

The Inside Collection

Decorative powder coatings

EN Decorative powder coatings

Four complimentary ranges of colours and textures for interior, architectural and industrial design applications, grouped as Rustic, Organic, Neo Lux and Fusion.

Thermosetting Powders

Hybrid (Alesta® EP) and Epoxy (Alesta® E) qualities.
All these colours are available from stock.

Thanks to their excellent decorative appearance together with high mechanical, chemical and anti-corrosive properties, Alesta® EP and Alesta® E powder coatings are used for the decoration and coating of pieces intended solely for indoor use as they have no UV resistance. Not designed for outdoor use.

Deviation of colour effect can occur, depending on the application. Please consult our technical documentation before application.

DE Dekorative Pulverbeschichtungen

Vier sich ergänzende Farbtöne und Strukturen für die Inneneinrichtung, für Fassaden und industrielle Anwendungen mit der Bezeichnung „Rustic, Organic, Neo Lux und Fusion“.

Wärmehärtendes Pulverlacksystem

Hybrid (Alesta® EP) und Epoxid (Alesta® E) Qualität. Alle diese Farbtöne sind ab Lager lieferbar.

Diese Pulverlacke verfügen über gute mechanische und chemische Eigenschaften sowie bester Korrosionsbeständigkeit. Direkte UV-Einstrahlung gilt es zu vermeiden. Alesta® EP und Alesta® E Pulverbeschichtungen sollten für die Beschichtung von Elementen ausschließlich im Innenbereich eingesetzt werden, da sie nicht UV-beständig sind. Nicht für Außenanwendungen geeignet.

Je nach Art der Anwendung können Abweichungen im Farbeffekt auftreten. Bitte beachten Sie vor der Applikation unsere technische Dokumentation.

ES Recubrimientos en polvo para aplicaciones decorativas

Cuatro gamas complementarias de colores y texturas para aplicaciones de diseño de interiores, arquitectónico e industrial: Rustic, Organic, Neo Lux y Fusion.

Pinturas en polvo termoendurecibles

Alesta® EP de epoxi y poliéster y Alesta® E de epoxi. Todos estos colores están disponibles en stock.

Gracias a su excelente aspecto decorativo junto con unas buenas características mecánicas, químicas y de protección anticorrosiva, las pinturas en polvo Alesta® EP y Alesta® E se usan para la decoración y el pintado de piezas destinadas únicamente para uso en interiores, ya que su resistencia a los rayos UV es baja. No están diseñadas para aplicaciones de exterior.

Dependiendo del tipo de aplicación, podrían apreciarse ligeras diferencias en el aspecto final de los productos con este tipo de efecto. Consulte nuestra documentación técnica antes de aplicar la pintura.

FR Revêtements en poudre pour décoration intérieure

Quatre ambiances complémentaires de teintes et de textures pour des applications en décoration, architecture intérieure et design industriel regroupées sous les noms Rustic, Organic, Neo Lux et Fusion.

Poudres thermodurcissables

Qualités hybride (Alesta® EP) et epoxy (Alesta® E).
Toutes ces teintes sont disponibles en stock.

Grâce à leurs excellentes propriétés décoratives et à leurs propriétés mécaniques, chimiques et anti-corrosion remarquables, les revêtements en poudre Alesta® EP et Alesta® E interviennent dans la décoration et le recouvrement des pièces destinées uniquement à un usage intérieur car ils n'ont aucune résistance aux UV. Ne convient pas pour une utilisation à l'extérieur.

Des variations de teintes peuvent apparaître en fonction des paramètres d'application. Consultez notre documentation technique avant l'application.

IT Vernici in polvere decorative

Rustic, Organic, Neo Lux e Fusion: quattro linee complementari di colori e texture per applicazioni in interno, architettura di interni e usi industriali.

Polveri termoindurenti

Variante ibrida (Alesta® EP) ed epossidica (Alesta® E).
Tutti i colori sono disponibili a stock.

Grazie alla straordinaria finitura decorativa e alle eccezionali proprietà meccaniche, chimiche e anti corrosive, le vernici in polvere Alesta® EP e Alesta® E vengono utilizzate esclusivamente per il rivestimento e la decorazione di interni (nessuna resistenza UV). Non adatte per l'uso esterno.

Una volta applicati, i colori possono subire variazioni a seconda dell'uso. Consultare la documentazione tecnica prima dell'impiego.

SE Dekorativa pulverlackeringar

Fyra kompletterande färgskalor och strukturer för inomhus-, arkitektoniska och industriella designapplikationer, grupperade som Rustic, Organic, Neo Lux och Fusion.

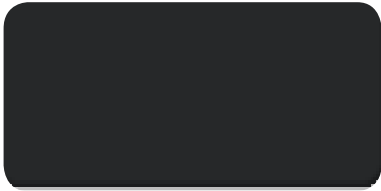

Termohärdande pulverfärg

Hybrid (Alesta® EP) and Epoxy (Alesta® E) kvaliteter.
Alla dessa färger finns i lager.

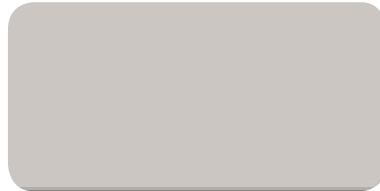

Tack vare deras utmärkta dekorativa utseende samt starka mekaniska, kemiska och rostskyddande egenskaper, så används Alesta® EP och Alesta® E puderpulverfärger för dekoration och beläggning av delar som uteslutande är för inomhusbruk, eftersom de saknar UV-beständighet. Inte avsedd för utomhusbruk.

Färgavvikelser kan förekomma, beroende på appliceringen. Var vänlig konsultera vår tekniska dokumentation innan applicering.
